YSACKE Systems LLC

Governance-Driven Cybersecurity & Cloud Advisory for Regulated Environments

Core Capabilities

- Cybersecurity Governance & Risk Oversight
- Threat & Vulnerability Management (TVM) Governance
- Cloud Security Architecture Advisory
- Security Program Transformation
- Executive Risk Reporting & Visibility

Representative Experience

- Supported enterprise vulnerability governance across large-scale environments
- Delivered executive risk reporting and cybersecurity visibility to leadership
- Led remediation oversight across hybrid cloud and enterprise environments

Federal & Enterprise Alignment

- NIST Cybersecurity Framework (CSF)
- NIST SP 800-53 / FISMA-aligned environments
- Zero Trust Architecture (ZTA) Strategy & Advisory
- Enterprise Risk Governance & Compliance Integration
- Audit, Controls Validation & Continuous Monitoring Support

Federal Subcontracting & Teaming Value

- Vulnerability governance oversight within large-scale federal environments
- Risk reporting and executive-level cybersecurity visibility
- Cloud security governance aligned to federal compliance frameworks
- Structured remediation strategy and backlog risk reduction
- Support for Zero Trust and enterprise security transformation initiatives

Key Differentiators

- Governance-first cybersecurity advisory model
- Bridges executive leadership and technical remediation teams
- Independent advisory (no vendor bias)
- Designed for regulated and mission-critical environments

Certifications

- CISM | PMP | CCNP | AZ-500
